

A Factual messages and semantic links

Illustrative deterministic example; evidence and source remain separate from status.

Owned links: H/A asserts certainty; R/B checks evidence; B/C selects review or approve.

B Cancel R: patch its draft, then replay the decision

$U = \{H, B\}$: keep H and B; replace R by its reference operation.

Copy the CURRENT input status; retain the other fields of the R draft.

For a native creation, its reference introduces no new target meaning.

C Retain the mode; allow its realized behavior to change

R always checks the available evidence before stating verification status.

The same rule yields a correction above and a preservation below.

D From replayed losses to Behavioral Shapley

1 = retained; 0 = reference

H	R	B	$v^L(U)$
0	0	0	0
1	0	0	0
0	1	0	0
0	0	1	0
1	1	0	0
1	0	1	1
0	1	1	0
1	1	1	0

$$\Delta_R(S) = v^L(S \cup \{R\}) - v^L(S)$$

S	$\Delta_R(S)$	Weight	Product
$\emptyset$	$0 - 0 = 0$	1/3	0
{H}	$0 - 0 = 0$	1/6	0
{B}	$0 - 0 = 0$	1/6	0
{H, B}	$0 - 1 = -1$	1/3	-1/3

$$\psi_{(H, R, B)} = (1/6, -1/3, 1/6)$$
